Not sure what shape your website is in?

Your website is often the first thing a new customer sees. If it loads slowly, looks wrong on a phone or does not show up on Google, people leave and you never learn why. We **review it the way your customers would see it** and tell you, in writing, what to do about it.

OUR OWN TEST Over 1 in 4 of 1,076 business websites we tested in October 2026 scored Poor on Google's phone speed test.

WHAT YOU GET

- **A written report, in 3 business days or less:** what works, what is broken, what to fix first, and how.
- **Four checks:** speed and loading time, phones and computers, Google, and security.
- **An outside view only.** Nothing is installed on your site and no passwords are needed.
- **A conversation with the president,** Rodrigo Landa, to talk it through, at no charge.

Why METROLUX?

SIX REASONS

01

One company, start to finish

We design your website, build it, host it and support it, and we can run your email, cloud and office IT too. One company, one place to call when something needs fixing.

02

Turnkey projects

Problems get solved instead of creating more headaches for you. We handle everything, hosting too, and you get a clear scope and price before we start. No surprises.

03

You talk to the president

Rodrigo Landa, our president, leads every review and talks it through with you at no charge. Your questions go to the person responsible for the work.

04

No lock-in

Your domain stays in your name and you always get the website files, so you control the source code. Hosting stays with us for a bundle's included months, then it is month to month, cancel anytime.

05

We run on our own software

System 7x is our own platform. It runs Metrolux's own quotes, invoices, appointments and documents every day, so every feature is tested here before a client sees it.

06

English and Spanish

We work with you in Spanish or English, and System 7x and our website are bilingual. Based in Coral Gables, Miami, we build and host websites for businesses anywhere.
